

Hot Selling N4 N6 99.9% Seamless Pure Nickel Tube For Process Caustic Soda

Our Product Introduction

for more products please visit us on victory-alloy.com

Basic Information

- Place of Origin: China
- Brand Name: Victory
- Certification: CE,ROHS,ISO 9001
- Model Number: Ni200 Ni201
- Minimum Order Quantity: 1 Kg
- Price: 10 - 499 kilograms \$45.00
- Packaging Details: Spool package with Carton box, Coil package with polybag for Resistance wire
- Delivery Time: 7 to 20 Days
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 300 tons per month

Product Specification

- Product Name: Nickel Pipe
- Grade: Ni200 Ni201
- Material: Nickel
- Ni (Min): 99.9%
- Melting Point: 1370-1425 °C
- Ultimate Strength (MPa): ≥ 790
- Resistance ($\mu\Omega.m$): 1.15
- Ultimate Strength (\geq MPa): 790
- Elongation (\geq %): 30
- Surface: Bright
- Application: Extreme Environment Industry
- MOQ: 1 Kg
- Size: Customized Size
- Highlight: Nickel 201 seamless nickel alloy pipe, seamless nickel alloy pipe ASTM B161, ~~seamless nickel alloy pipe~~

PURE NICKEL TUBE

N4,N6,Ni200,Ni201

Customized service available

Material: pure nickel and nickel alloy

Grade: (Chinese) N4 N6 ; (American) Ni201 Ni200

Type: Nickel Pipe, Seamless, welding tube

Dimensions: Wall Thickness 1mm min. accept customized

Features:

- (1) Low Density and High Specification Strength
- (2) Excellent Corrosion Resistance
- (3) Good resistance to effect of heat
- (4) Excellent Bearing to cryogenic property
- (5) Nonmagnetic and Non-toxic

Characteristic and Differences:

Nickel 200 is commercially pure wrought nickel. It is highly resistant to various reducing chemicals. It can also be used in oxidizing conditions that cause the formation of a passive oxide film, for instance its unexcelled resistance to caustic alkalis.

Nickel 200 is limited to service at temperatures below 315°C, because at higher temperatures it suffers from graphitization which results in severely compromised properties. In that circumstance, Nickel 201 is used instead. It has a high Curietemperature and good magnetostrictive properties. Its thermal and electrical conductivities are higher than nickel alloys.

Nickel 201 is the low-carbon version of Nickel 200. Because of its low carbon content, Nickel 201 is not subject to embrittlement by intergranularly precipitated carbon or graphite when exposed to temperatures of 315 to 760°C for prolonged time if carbonaceous materials are not in contact with it. Therefore, it is a substitute for Nickel 200 in Applications above 315°C. However it does suffer from intergranular embrittlement by sulfur compounds at temperatures above 315°C. Sodium peroxide can be used to change them to sulfates to counteract their effect.

Application Field

Nickel tube are widely used in many fields

Pure nickel tubes are widely used in various fields due to their excellent corrosion resistance, high temperature strength, and conductivity. These fields include:

1. Chemical industry: Pure nickel tubes are used in the chemical industry to manufacture reactors, heat exchangers, storage tanks, pipelines, and valves, which can withstand harsh environments such as strong acids, strong alkalis, and high temperatures.
2. Aerospace industry: Pure nickel tubes are used in the aerospace industry to manufacture aircraft engines, rocket engines, gas turbines, and other high-temperature and high-pressure equipment, which can withstand high-temperature corrosion and high-stress environments.
3. Nuclear energy industry: Pure nickel tubes are used in the nuclear energy industry to manufacture fuel elements, fuel rods, and cooling tubes in nuclear reactors, which can withstand high temperatures, high pressures, and radiation environments.
4. Electronics industry: Pure nickel tubes are used in the electronics industry to manufacture semiconductor devices, vacuum tubes, optoelectronic devices, and electron tubes, which can provide excellent electrical and thermal conductivity.

In summary, pure nickel tubes are a high-performance metal material with a wide range of applications.

Company Profile

We are a leading alloy metal manufacturer founded in 2002, providing high-quality and high-performance alloy products and services to our customers. Our company is dedicated to becoming the industry leader in the alloy field, and we have received multiple industry certifications and awards, including the ISO9001 International Quality Management System Certificate and the SGS Certificate.

Over the past 18 years, we have focused on the resistance alloy business and continuously innovated and explored, ultimately developing new nickel-based alloy products such as chromium-nickel-iron alloy, Monel alloy, Hastelloy alloy, high-temperature alloy, and more.
