### Product Specification

Product Name:	Pure Nickel Strip	VK
Grade:	N4,N6,Ni200,Ni201	V#A.
• Metal:	Nickel	
• Ni(min):	99.5%	
<ul> <li>Resistance (μΩ.m):</li> </ul>	1.5	A
• Ultimate Strength (≥ MPa):	462	
<ul> <li>Elongation (≥ %):</li> </ul>	45	-
• Surface:	Bright	-
<ul> <li>Density (g/cm3):</li> </ul>	8.9 G/cm3	
<ul> <li>Resistivity:</li> </ul>	1.35±0.07	
<ul> <li>Melting Point(°C):</li> </ul>	1435-1446 °C	
<ul> <li>Application:</li> </ul>	Chemical Industry	
• M.O.Q:	2KG	
• Highlight:	Pure Nickel Strips For Battery Packs, 99.9% Nickel Strips For Battery Packs,

Product Description

# **PURE NICKEL STRIP**

N4,N6,Ni200,Ni201

Customized service available

It has excellent mechanical properties, high corrosion resistance in ifferent environments, and magnetic feature, high heat transfer, high conductivity, low gas volume and low vapor pressure. It also has good spot welding properties and high tensile strength. It mainly used in lithium batteries, battery ear, metal stamping parts, electric vehicles, nickel batteries, telecommunications, electric vacuum, special bulbs and other industries.

#### **Dimension:**

- The thickness and dimensions can be met what customers required.
- 1. Material: pure nickel or nickel steel
- 2. Width: 2, 3, 4, 5, 6, 7, 8, 10, 15mm or customized width
- 3. Thickness: hot sale are 0.15mm/0.2mm, or customized thickness
- 4. Used for 18650, 26650, ,21700,32650, 32700 battery pack
- 4. Color: silver
- 5. 18650 nickel strip: 1P, 2P, 3P, 4P, 5P, 6P, 7P, 8P, 9P
- 26650 nickel strip: 1P, 2P, 3P, 4P, 5P, 6P, 7P, 8P, 9P 32650 nickel strip: 1P, 2P, 3P, 4P, 5P

#### Features:

- 1. Low resistance, make the battery pack more powerful, save energy.
- 2. Pure Nickel to make it easy welding, stable connection
- 3. Dood tensile and easy operate assembly.
- 4. shaped design, save too much work for customer to assembly battery pack.
- 5. High Electrical Conductivity
- 6. Anti-corrosive and low resistance

#### **Physical properties:**

- 1.Spot welding is good
- 2. The resistance is lower
- 3. Battery discharge time longer
- 4. The battery spot welding is stronger.

#### **Functions/Applications:**

- 1. manufacturing nickel-cadmium battery
- 2. nickel-hydrogen battery
- 3. lithium cell
- 4. assembled battery
- 5. industries of electric tool and special lights
- 6. Superconductor Applications

#### Specification

Grade	Ni+Co	Cu	Si	Mn	С	Mg	S	Р
N4	99.8	0.015	0.03	0.002	0.01	0.01	0.001	0.00 1

Ni201	≥99.0	≤0.25	≤0.35	≤0.35	≤0.02	/	≤0.01	1
Ni200	≥99.2	≤0.25	≤0.35	≤0.35	≤0.15	/	≤0.01	1

Material	18650/21700/26650/32650 nickel strip	
Dimension	1P to 9P	
Available Space	18.5mm,19mm, 19.5mm, 20.2mm	
Usage	Use for 18650 battery pack	
Package	Nickel strip in roll pack into carton	
Physical properties	High temperature resistant, corrosion resistance,	
Technical support	With imported stamping machine, Japanese Sodick, complete mold (more than 2000 sets of battery industry hardware mold), and can open mold independently.	
Functions	Products are widely used in energy storage battery, new energy vehicles, electric bicycles, solar street lights, power tools and other energy products

## Product Details High-quality materials and surface treatment technology

Nickel strip is a thin metal strip made of nickel and is commonly used in various application areas, including:

1. Battery assembly: Nickel strip is commonly used as an internal connector and support material for batteries, capable of withstanding high temperature and high-pressure environments, while maintaining good conductivity and stability.

2. Electronic devices: Nickel strip is often used as a connecting wire and conductor for electronic components, circuit boards, and other devices.

3. Solar panels: Nickel strip is used as an internal connector and support material for solar panels, capable of withstanding high temperature and high-pressure environments, while maintaining good conductivity and stability.

4. Thermocouples: Nickel strip can be used to manufacture thermocouples, which are used for temperature measurement and for converting temperature signals into electrical signals.

5. Chemical industry: Nickel strip can be used to manufacture steam heaters and coolers in chemical equipment and reactors.

6. Other fields: Nickel strip can also be used to manufacture anti-static materials, conductive tapes, electromagnetic shielding materials, and more.

In summary, nickel strip has excellent conductivity, corrosion resistance, and stability, making it suitable for use in multiple application areas.

1000+ Metal Products

# 2000+

Cooperative Business

# **Company Profile**

We are a leading alloy metal manufacturer founded in 2002, providing high-quality and high-performance alloy products and services to our customers. Our company is dedicated to becoming the industry leader in the alloy field, and we have received multiple industry certifications and awards, including the ISO9001 International Quality Management System Certificate and the SGS Certificate. Over the past 18 years, we have focused on the resistance alloy business and

50+

Certifications

Over the past 18 years, we have focused on the resistance alloy business and continuously innovated and explored, ultimately developing new nickel-based alloy products such as chromium-nickel-iron alloy, Monel alloy, Hastelloy alloy, high-temperature alloy, and more.
