Our Product Introduction

for more products please visit us on victory-alloy.com

China Victory

ISO9001,ROHS

Model Number:

Basic Information

Incoloy 800,800H,800HT,825,925

• Minimum Order Quantity: 5 Kg

• Price:

50 - 499 kilograms \$36.00

Packaging Details:

Incoloy bar is packed into wooden cases. Special packaging requirements can also be accommodated. OEM is also acceptable

7-20 Days

• Delivery Time: • Payment Terms:

L/C, T/T, Western Union, MoneyGram

• Supply Ability: 300 tons per month

Product Specification

• Product Name: Nickel Alloy Round Bar Material: Iron Nickel Material

Ni (Min): • Resistance ($\mu\Omega$.m): 1.15 • Ultimate Strength (≥ MPa): 965 Elongation (≥ %): • Density: 8.2 G/cm3 • Powder Or Not: Not Powder

Sureface: Bright,Oxided Application: Construction, Industry Size: Customized Size Service: OEM\ODM

Highlight: 500mm Nickel Annealed Alloy Bar,

Incoloy Alloy 825

Product Description

Our Product Introdu

INCOLOY BAR

Incoloy 800,800H,800HT,825,925

Customized service available

Incoloy 800 825 Inconel 600 718 Monel 400 /404 K500 C276 1-500mm Nickel Annealed Alloy Bar

Applications:

- 1.Petrochemical Industry: Incoloy bars are extensively used in the petrochemical industry for applications such as heat exchangers, reactors, furnace components, and piping systems. Their high-temperature resistance and corrosion resistance make them ideal for handling corrosive chemicals and operating in high-temperature environments.
- 2.Power Generation: Incoloy bars find applications in power generation facilities, including nuclear power plants and thermal power plants. They are used in steam generator tubing, boiler components, and exhaust systems due to their ability to withstand high temperatures and corrosive environments.
- 3.Aerospace Industry: Incoloy bars are utilized in the aerospace industry for engine components, turbine blades, and exhaust systems. The high-temperature resistance and mechanical strength of Incoloy make it suitable for withstanding the demanding conditions of aircraft engines.
- 4.Chemical Processing: Incoloy bars are employed in chemical processing applications, including reactors, heat exchangers, and piping systems. Their corrosion resistance and ability to handle high-temperature and high-pressure environments make them well-suited for chemical processing operations.
- 5.Marine and Offshore Industry: Incoloy bars are used in the marine and offshore industry for applications such as seawater piping, heat exchangers, and offshore platform components. Their corrosion resistance to seawater and harsh marine environments make them suitable for these applications.
- 6.Pharmaceutical Industry: Incoloy bars find applications in the pharmaceutical industry for equipment and components that require resistance to corrosive chemicals and high-temperature sterilization processes.

Application Field

Incoloy bars are widely used in many fields

Incoloy is a family of high-performance nickel-chromium alloys that are known for their excellent resistance to corrosion, high temperature and pressure, and good mechanical properties. Incoloy bars are commonly used in a variety of applications, including:

- 1. Aerospace: Incoloy bars are used in a variety of aerospace applications, such as gas turbine engine components, exhaust systems, and heat exchangers.
- 2. Chemical processing: Incoloy bars are used in chemical processing plants due to their excellent

resistance to corrosion and high-temperature environments. They are used in applications such as heat exchangers, reactors, and piping systems.

- 3. Oil and gas: Incoloy bars are used in the oil and gas industry due to their excellent resistance to corrosion and high-temperature environments. They are used in applications such as downhole tubulars, wellhead components, and offshore platforms.
- 4. Power generation: Incoloy bars are used in power generation applications such as boilers and steam generators due to their excellent resistance to high-temperature and high-pressure environments.
- 5. Food processing: Incoloy bars are used in the food processing industry due to their resistance to corrosion and ability to withstand high-temperature cleaning processes. They are used in applications such as heat exchangers and processing equipment.

OEM Services

We can provide customized services for customers

Product Customization

Size:8.0-200mm

We can customize incoloy bars of different size for customers.

Label Customization

We can provide label customization service for customers' products.

Company Profile

We are a leading alloy metal manufacturer founded in 2002, providing high-quality and high-performance alloy products and services to our customers. Our company is dedicated to becoming the industry leader in the alloy field, and we have received multiple industry certifications and awards, including the ISO9001 International Quality Management System Certificate and the SGS Certificate.

Over the past 18 years, we have focused on the resistance alloy business and

Over the past 18 years, we have focused on the resistance alloy business and continuously innovated and explored, ultimately developing new nickel-based alloy products such as chromium-nickel-iron alloy, Monel alloy, Hastelloy alloy, high-temperature alloy, and more.

Our Certifications

Our products have obtained national standard certification
