Our Product Introduction

Product Description

Monel Bar, also known as Monel K500 Bar, is a high-performance alloy bar using the grade Monel K500. It is a nickel-copper-based alloy containing alloying elements such as aluminum and titanium that provides excellent corrosion resistance and mechanical properties. Monel K500 Bar is known for its excellent corrosion resistance. It can resist corrosion from corrosive media such as seawater, hydrochloric acid, sulfuric acid and chloride. This makes it widely used in fields such as marine engineering, chemical industry and petroleum industry. In addition, Monel K500 Bar also exhibits excellent mechanical properties. It has high strength and hardness and can maintain stable performance in high stress and high temperature environments. This makes it widely used in fields such as aerospace, nuclear industry and automobile manufacturing.
