Product Description

Kovar Strip is a special type of alloy strip that uses an alloy grade called Kovar. Known for its excellent performance and wide range of applications.

One of the key features of Kovar Strip is its low thermal expansion performance. Its thermal expansion coefficient is close to that of materials such as glass and ceramics, making it an ideal choice for packaging and connection applications. Kovar Strip can achieve good thermal expansion matching with glass packaging materials, reduce stress and mismatch problems caused by temperature changes, and ensure the stability and reliability of packaging.
