# **Product Description**

Kovar Strip is a special alloy strip that uses an alloy grade called Kovar. It is highly regarded for its excellent performance and diverse application fields.

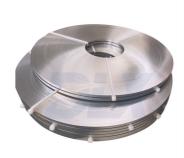

One of the notable features of Kovar Strip is its excellent thermal stability. It has an extremely low coefficient of thermal expansion, which is similar to the thermal expansion coefficient of materials such as glass and ceramics. Therefore, Kovar Strip performs well in the connection with glass packaging materials, reducing stress and mismatch issues caused by temperature changes. This thermal stability makes Kovar Strip an ideal option for electronic packaging and electronic connection applications.
