

Nickel Alloy 0.1mm Inconel 625 Strip Hot Cold Rolled

Our Product Introduction

for more products please visit us on victory-alloy.com

Basic Information

- Place of Origin: China
- Brand Name: Victory
- Certification: CE,ROHS,ISO 9001
- Model Number: Inconel 625
- Minimum Order Quantity: 1 Kg
- Price: Negotiable
- Packaging Details: Packed as coil. Special packaging requirements can also be accommodated. OEM is also acceptabl
- Delivery Time: 7 to 20 Days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 Ton/Tons per Month

Product Specification

- Product Name: Inconel 625 Strip
- Material: Ni Cr Fe
- Ni (Min): 58%
- Application: Chemical Reactors, Distillation Columns And Separation Equipment
- Density (g/m3): 8.44 G/cm3
- Thermal Expansion Coefficient: $12.8 \times 10^{-6}/^{\circ}\text{C}$
- Thermal Conductivity: 13.3 W/(m-K)
- Elongation (\geq %): 45%
- Melting Point: 1290-1350°C
- Yield Strength: 275 MPa
- Tensile Strength: 620 MPa
- Highlight: Nickel Alloy Inconel 625 Strip, Hot Cold Rolled Inconel 625 Strip, 0.1mm Inconel 625 Strip

Product Description

Nickel Alloy 0.1mm Inconel 625 Strip Hot Cold Rolled

Introduction:

Inconel 625 belts play an important role in the chemical processing industry. It is a high-temperature alloy strip with excellent corrosion resistance and high-temperature strength for use in harsh environments in the chemical processing industry. In critical applications such as chemical reactors, distillation towers, absorption towers and catalyst units, Inconel 625 tape resists corrosive media, high temperatures and pressure, ensuring safe operation and reliable performance of the equipment. Its excellent performance parameters make it an ideal material choice in the chemical processing industry. Overall, Inconel 625 tape provides an important material solution for the chemical processing industry with its excellent corrosion resistance and high temperature strength.

Characteristic:

Corrosion resistance: Inconel 625 tape has excellent corrosion resistance and can withstand corrosive media in the chemical processing industry, including acidic, alkaline and salt solutions.

High temperature stability: This strip can maintain high strength and stability in high temperature environments and is suitable for high temperature components and devices in the chemical processing industry.

Oxidation Resistance: Inconel 625 tape has good antioxidant properties and is able to prevent oxidation and corrosion at high temperatures.

Advantage:

Corrosion resistance: One of the advantages of Inconel 625 belts in the chemical processing industry is its excellent corrosion resistance, which can reduce corrosion losses in equipment and pipelines and increase equipment service life.

High-temperature stability: Inconel 625 tape can maintain high strength and stability in high-temperature environments, and is suitable for high-temperature chemical reactors, catalyst pipes, and heating elements.

Oxidation resistance: The strip's antioxidant properties can prevent oxidation and corrosion under high temperature conditions, ensuring the reliability and long-term use of the equipment.

Application:

Chemical Reactors: Inconel 625 tape can be used in high temperature reactors, catalyst piping and heating elements in the chemical processing industry. It can withstand high temperatures and corrosive media and is used in various chemical reaction processes.

Distillation columns and separation equipment: Inconel 625 belts can be used in distillation columns, separation equipment and piping systems in the chemical processing industry. It can withstand corrosive media and high temperature conditions and is used in substance separation and purification processes.

Catalyst piping: Inconel 625 tape can be used in catalyst piping and reactor systems in the chemical processing industry. Due to its corrosion resistance and high temperature stability, it is able to withstand catalyst reactions and chemical changes under high temperature conditions.

Other relevant knowledge points:

The chemical processing industry refers to the industrial field that uses chemical methods and processes to transform raw materials, synthesize compounds, separate, purify, and process chemicals.

In the chemical processing industry, material selection needs to consider factors such as corrosion resistance, high temperature performance, pressure resistance and compatibility with media.

The design and manufacturing of equipment and pipelines need to comply with relevant safety standards and specifications to ensure the safety, reliability and compliance of the equipment with industry requirements.

The operation and management of the chemical processing industry requires compliance with strict safety measures and environmental protection requirements to ensure the safety of operators, reduce the risk of accidents, and protect the environment from pollution.

Parameter:

Chemical Properties of Inconel 625

Nickel	Chromium	Molybdenum	Iron	Niobium and Tantalum	Cobalt	Manganese	Silicon
58%	20%-23%	8%-10%	5%	3.15%-4.15%	1%	0.5%	0.5%

Type we could offer

AMS Number	Alloy	Type	UNS	Cross Ref. Spec	Misc./Shape
AMS 5581	Inconel 625	Nickel	N06625		
AMS 5581 Custom Tube	Inconel 625	Nickel	N06625	-	Custom Tube

AMS Number	Alloy	Type	UNS	Cross Ref. Spec	Misc./Shape
AMS 5581 Tubing	Inconel 625	Nickel	N 0 6 6 2 5	-	Tubing
AMS 5599	Inconel 625	Nickel	N 0 6 6 2 5		
AMS 5599 Plate	Inconel 625	Nickel	N 0 6 6 2 5	-	Plate
AMS 5599 Sheet	Inconel 625	Nickel	N 0 6 6 2 5	-	Sheet
AMS 5599 Strip	Inconel 625	Nickel	N 0 6 6 2 5	-	Strip
AMS 5666	Inconel 625	Nickel	N 0 6 6 2 5		
AMS 5666 Bar	Inconel 625	Nickel	N 0 6 6 2 5	-	Bar
AMS 5666 Custom Tube	Inconel 625	Nickel	N 0 6 6 2 5	-	Custom Tube
AMS 5666 Forging	Inconel 625	Nickel	N 0 6 6 2 5	-	Forging
AMS 5666 Ring	Inconel 625	Nickel	N 0 6 6 2 5	-	Ring
AMS 5869	Inconel 625	Nickel	N 0 6 6 2 5		
AMS 5869 Plate	Inconel 625	Nickel	N 0 6 6 2 5	-	Plate

AMS Number	Alloy	Type	UNS	Cross Ref. Spec	Misc./Shape
AMS 5869 Sheet	Inconel 625	Nickel	N 0 6 6 2 5	-	Sheet
AMS 5869 Strip	Inconel 625	Nickel	N 0 6 6 2 5	-	Strip

 Welcome customized size
 We are experience factory for OEM&ODM service

Q & A:

Q: Does your factory have the capability to produce large quantities of Inconel 625 strips?

A: Yes, our factory is equipped with advanced manufacturing facilities and has the capability to produce large quantities of Inconel 625 strips.

Q: What measures does your factory take to ensure the consistency and quality of Inconel 625 strip production?

A: Our factory places a strong emphasis on quality control throughout the production process of Inconel 625 strips. We have implemented strict quality assurance procedures, including raw material inspection, in-process monitoring, and final product testing to ensure consistency and adherence to specifications.
