

Top Performing Thermocouple Bare Wire For Accurate Temperature Readings

Basic Information

- Place of Origin: China
- Brand Name: Victory
- Certification: ISO SGS
- Model Number: Thermocouple Bare Wire

Product Specification

- Highlight: **Top Performing Thermocouple Bare Wire, Accurate Temperature Readings Thermocouple Bare Wire**

Product Description

Product Description:

The wire has a density of 7.4g/cm³, making it a durable and reliable choice for industrial use. It is also available in a wide range of colors, allowing it to be customized to suit specific requirements.

The Thermocouple Bare Wire is designed to be used without any shielding, making it a cost-effective option for those who need a reliable high temp electrical wire without the extra expense of adding shielding.

For those who require an insulated electrical wire, the Thermocouple Bare Wire can be supplied with an enamelled wire coating. This coating provides an added layer of protection against corrosion and other environmental factors, making it ideal for use in harsh industrial environments.

The outer jacket material of the Thermocouple Bare Wire is not included as it is designed to be used as a bare wire. This allows for greater flexibility in terms of installation and use, as the wire can be easily manipulated and shaped to suit the specific needs of the application.

In summary, the Thermocouple Bare Wire is a high temperature alloy wire that is durable, reliable, and customizable. It is a cost-effective option for those who require a high temp electrical wire without the need for shielding, and can be supplied with an enamelled wire coating for added protection. With its flexibility and versatility, the Thermocouple Bare Wire is an ideal choice for a wide range of industrial applications.

Applications:

The Thermocouple Bare Wire is designed for applications in which precise temperature measurement is required. The product is commonly used in the manufacture of K type thermocouple cables, which are widely used in temperature measurement and control systems. The thermocouple cables are used in various industries such as metallurgy, chemical, and machinery. The product is also suitable for high-temperature applications, thanks to its high-temperature alloy wire composition, which makes it resistant to high temperatures.

The Thermocouple Bare Wire is ideal for use in scenarios where high accuracy temperature measurement is required. For example, it is suitable for use in the temperature measurement of molten metal in the metallurgical industry, as well as for temperature measurement in furnace heating systems. The product is also used in the temperature measurement of cement and glass production, where accurate temperature measurement is necessary for quality control purposes.

The Thermocouple Bare Wire is compatible with various thermocouple protection tubes, including cast iron thermocouple protection tubes. The product can be used in conjunction with these protection tubes to provide accurate and reliable temperature measurement in harsh environments. The product is also suitable for use in the temperature measurement of various liquids, including water, oil, and gas.

The minimum order quantity for the Thermocouple Bare Wire is 5, and samples are acceptable. Overall, Victory's

Thermocouple Bare Wire is a high-quality product that is suitable for use in various temperature measurement applications.

Support and Services:

Packing and Shipping:

Product Packaging:

The Thermocouple Bare Wire product will be packaged in a sturdy cardboard box with protective foam inserts to prevent any damage during shipping.

Shipping:

The product will be shipped via standard ground shipping. Expedited shipping options are available for an additional fee. Shipping costs will be calculated at checkout.

FAQ:

Q: What is the brand name of this product?

A: The brand name is Victory.

Q: What is the model number of this product?

A: The model number is Thermocouple Bare Wire.

Q: Where is this product made?

A: This product is made in China.

Q: What is the minimum order quantity for this product?

A: The minimum order quantity is 5.

Q: Is this product suitable for measuring temperature?

A: Yes, this product is a type of thermocouple, which is designed for measuring temperature.
