

## Customizable Thermocouple Bare Wire For Specific Temperature Sensing Requirements

Our Product Introduction

### Basic Information

- Place of Origin: China
- Brand Name: Victory
- Certification: ISO SGS
- Model Number: Thermocouple Bare Wire

### Product Specification

- Highlight: Specific Temperature Sensing Thermocouple Bare Wire  
, Specific Temperature Sensing Bare Wire,  
Customizable Thermocouple Bare Wire

for more products please visit us on [victory-alloy.com](http://victory-alloy.com)

## Product Description

### Product Description:

The wire's enamelled dia is 0.025mm, making it perfect for use in a variety of thermocouple applications. The enamelled wire can be supplied as per the requirement of the customer. The wire can be packed in spool or coil as per the size needed. The Thermocouple Bare Wire is a heat-resistant wire mesh that can withstand high temperatures, making it suitable for use in harsh environments. This product is ideal for use in industrial applications that require reliable and accurate temperature measurements.

Overall, the Thermocouple Bare Wire is a high temp electrical wire that is built to last. It is a must-have component for anyone who needs to measure temperature accurately and reliably.

### Applications:

The Thermocouple Bare Wire is designed for various applications, including measuring temperature in industrial processes. It is commonly used in conjunction with Ceramic Thermocouple Protection Tubes, which protect the wire from damage in harsh environments. The wire is compatible with S-type Pt-Rh10 thermocouples, which are commonly used for high-temperature measurements.

This product is ideal for industries that require high-temperature measurements, such as the petrochemical, metallurgical, and automotive industries. The Thermocouple Bare Wire is also suitable for use in laboratory settings where high-temperature measurements are necessary.

The Thermocouple Bare Wire is easy to install and can be used in a variety of scenarios. It can be used in applications where the temperature varies from -200°C to 1200°C. The wire can be used in furnaces, boilers, and other high-temperature equipment, where it can withstand the extreme temperatures and harsh conditions.

The minimum order quantity for Victory's Thermocouple Bare Wire is 5, making it an accessible product for small businesses and laboratories. The wire's outer jacket material is none, making it a flexible and versatile product that can be used in various applications.

Overall, Victory's Thermocouple Bare Wire is a reliable and high-quality product that is suitable for a range of high-temperature applications. It is a cost-effective and durable solution for industries that require accurate temperature measurements in harsh environments.

### Support and Services:

The Thermocouple Bare Wire product is designed to measure temperature in a variety of applications. Our technical support team is available to assist with any questions or concerns regarding the installation, calibration, and maintenance of the product. Additionally, we offer services such as custom calibration and repair to ensure accurate and reliable temperature measurement. Contact us for more information on our technical support and services.

### Packing and Shipping:

Product Packaging:

The Thermocouple Bare Wire product will be securely packaged in a cardboard box to ensure safe delivery. Each box will contain the ordered length of Thermocouple Bare Wire wrapped around a spool and sealed with plastic wrap. The spool will be placed inside the box with enough packing material to prevent movement during transportation.

Shipping:

The Thermocouple Bare Wire product will be shipped via a trusted courier service to the address provided by the customer. The shipping cost will be calculated based on the destination and weight of the package. Customers will receive a tracking number via email to track the status of their shipment.

### FAQ:

**Q: What is the brand name of this product?**

A: The brand name of this product is Victory.

**Q: What is the model number of this product?**

A: The model number of this product is Thermocouple Bare Wire.

**Q: Where is this product manufactured?**

A: This product is manufactured in China.

**Q: What is the minimum order quantity for this product?**

A: The minimum order quantity for this product is 5.

**Q: What is the application of this product?**

A: The Thermocouple Bare Wire is used to measure temperature in various industrial applications.
