

30mm Thickness Metal Foam Mirror Smooth Surface

Our Product Introduction

for more products please visit us on victory-alloy.com

Basic Information

- Place of Origin: China JiangSu
- Brand Name: Victory
- Model Number: Metal Foam

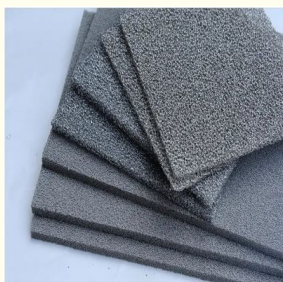

Product Specification

- Eines: 231-159-6
- Surface: Mirror, smooth, etc
- Design Style: Traditional
- Thermal Conductivity: 0.05-0.5 W/mK
- Lightweight: Yes
- Package: Wooden Case
- Thickness: Maximum Thickness 30mm
- Compressive Strength: 1-10 MPa
- Highlight: **30mm Thickness Metal Foam, Smooth Surface Metal Foam, Mirror Surface Metal Foam**

Product Description

Product Description:

One of the standout features of our Metal Foam product is its open-cell foam type. This means that the foam has a porous structure that allows air and other gases to flow freely through it. This makes it an ideal material for use in applications where breathability is important, such as in the construction of acoustical panels or soundproofing materials.

Our Metal Foam product is incredibly versatile and can be used in a wide range of applications. One popular use for this foam is as a colored foam board for use in signage and displays. Its lightweight properties make it easy to move around and install, while its durable construction ensures that it can withstand exposure to the elements. Additionally, its open-cell structure makes it an ideal material for use in flexible polyurethane foam and CR sealed foam applications.

Another great use for our Metal Foam product is as an aluminum foam panel with marble. This unique combination of materials creates a stunning finished product that is both beautiful and functional. The aluminum foam provides strength and durability, while the marble gives the panel a sleek and polished look. This product is perfect for use in high-end interior design applications, such as in the construction of luxurious hotels or high-end retail spaces.

Overall, our Metal Foam product is an excellent choice for anyone looking for a versatile and high-quality foam material. Its lightweight properties, open-cell foam type, and wide range of applications make it a standout choice in the industry. So if you're looking for a foam material that is both functional and beautiful, then look no further than our Metal Foam product.

Applications:

High Iron Buffer Foam

Victory Metal Foam can be used as a high iron buffer foam in various industries. Its open cell structure and compressive strength make it an ideal material for absorbing shock and reducing vibration. It can be used in automotive, aerospace, and defense industries where high iron buffer foam is required.

Bulk Foam Block

Victory Metal Foam can be used as a bulk foam block for insulation and sound absorption. Its lightweight property makes it easy to handle and transport. It can be used in the construction industry for insulation purposes and in the music industry for soundproofing purposes.

Flexible Polyurethane Foam

Victory Metal Foam can also be used as a flexible polyurethane foam replacement in various applications. Its open cell structure allows for better air circulation and ventilation. It can be used in the furniture industry for cushions and mattresses, and in the automotive industry for seat cushions.

In conclusion, Victory Metal Foam is a versatile product that can be used in various industries and applications. Its unique properties such as high iron buffer foam, bulk foam block, and flexible polyurethane foam replacement make it an ideal material for many scenarios.

Support and Services:

Metal Foam is a unique and innovative product that requires specialized technical support and services to ensure optimal performance. Our team of experts is dedicated to providing superior technical assistance to our customers to help them get the most out of their Metal Foam product.

We offer a range of services, including installation support, troubleshooting, and maintenance assistance. Our team can assist with any issues that may arise during the installation process and provide guidance on the best practices for maintaining your Metal Foam product. In addition, we provide ongoing technical support to ensure that your Metal Foam product continues to perform at its best. Our team can help with any questions or concerns you may have and offer advice on how to optimize your product for your specific needs.

At Metal Foam, we are committed to providing exceptional technical support and services to our customers. Contact us today to learn more about our support offerings and how we can help you get the most out of your Metal Foam product.

Packing and Shipping:

Product Packaging:

The metal foam product will be packaged with care to ensure that it is protected during transport. It will be wrapped with a layer of bubble wrap and placed in a sturdy cardboard box with packing peanuts to prevent movement. The box will be labeled with the product name, dimensions, and weight for easy identification.

Shipping:

The metal foam product will be shipped via a reliable courier service such as FedEx or UPS. Shipping options will be provided at checkout and will include standard or expedited shipping. Once the order is processed, a tracking number will be provided to the customer so they can track their shipment. Delivery times will vary depending on the shipping option selected and the destination.

FAQ:

Q: What is the brand name of the metal foam product?

A: The brand name of the metal foam product is Victory.

Q: What is the model number of the metal foam product?

A: The model number of the metal foam product is Metal Foam.

Q: Where is the metal foam product manufactured?

A: The metal foam product is manufactured in China JiangSu.

Q: What are the main features of the metal foam product?

A: The metal foam product is lightweight, has high energy absorption, excellent thermal conductivity, and good sound insulation properties.

Q: What are the typical applications of the metal foam product?

A: The metal foam product can be used in various industries such as aerospace, automotive, construction, and energy due to its unique

properties and versatility.
