

## Lightweight Aluminum Panel Open Cell Foam Marble Decoration For Sound Absorption

### Our Product Introduction

for more products please visit us on [victory-alloy.com](http://victory-alloy.com)

#### Basic Information

- Place of Origin: China JiangSu
- Brand Name: Victory
- Model Number: Metal Foam

#### Product Specification

- Product: Aluminum Foam Panel With Marble
- Foam Type: Open-cell
- Lightweight: Yes
- Thermal Conductivity: 0.05-0.5 W/mK
- Keywords: Open Cell Metal Foam
- Design Style: Traditional
- Package: Wooden Case
- Thickness: Maximum Thickness 30mm
- Highlight: **lightweight open cell foam aluminum panel, decoration open cell foam aluminum panel, 30mm open cell foam aluminum panel**

## Product Description

### Product Description:

Our Metal Foam is a unique open-cell foam type that allows for greater flexibility and customization. The open-cell structure allows for better airflow, making it an excellent choice for insulation and soundproofing applications. Additionally, the foam can be easily cut and shaped to fit any project requirements.

The Aluminum Foam Panel With Marble is an innovative product that combines the strength and durability of aluminum with the beauty of marble. The result is a stunning and unique material that can be used in a variety of applications such as furniture, wall cladding, and flooring. The panel is available in a range of colors to suit any design preference.

Our Metal Foam product has a pore size ranging from 0.1-10mm, making it an ideal material for filtration and separation applications. The open-cell structure allows for greater surface area, which enhances its filtering capabilities. The foam can be easily customized to fit any size or shape requirements.

The maximum thickness of our Metal Foam product is 30mm, making it an ideal choice for lightweight construction applications. The foam provides excellent strength and durability while remaining lightweight and easy to handle. The versatility of the product makes it an excellent choice for a wide range of projects.

Whether you need a colored foam board, EPDM rubber foam, or bulk foam block, our Metal Foam product is the perfect solution for your project needs. The open-cell foam type allows for greater customization and flexibility, while the aluminum foam panel with marble provides a unique and stunning material choice. With a range of pore sizes and maximum thickness options available, our Metal Foam product can be tailored to suit any project requirements.

### Applications:

The Victory Metal Foam is highly versatile and can be used in a wide range of product application occasions and scenarios. One popular use is for Aluminium Foam Panels, which are lightweight yet durable, making them perfect for use in the aerospace and automotive industries. The open cell structure of the metal foam also makes it an excellent material for sound insulation and vibration damping, which is why it can be found in acoustic panels used in recording studios and concert halls.

Another application of the Victory Metal Foam is in Foam Making Machines. The open cell structure of the foam allows for excellent flow and absorption of liquids, making it ideal for use in foam making machines that produce high-quality foam for a variety of applications, such as in the production of furniture, mattresses, and more.

The Victory Metal Foam is also ideal for use in Colored Foam Boards. The mirror and smooth surface finishes of the foam make it easy to apply colors and designs, making it perfect for use in the advertising and signage industries. Its lightweight and durability also make it an excellent choice for use in exhibitions and displays where portability is important.

With its high-quality attributes such as its pore size, surface finish, and versatility, the Victory Metal Foam is a reliable and cost-effective choice for a variety of product application occasions and scenarios.

### Support and Services:

Our Metal Foam product comes with comprehensive technical support to ensure that our customers can make the most of its unique properties and applications. Our team of experts is always available to answer any questions or concerns you may have about the product, as well as offer guidance on how to use it in your specific application.

In addition to technical support, we also offer a range of services to ensure that our customers get the most out of our Metal Foam product. These services include:

- Custom fabrication to meet your specific requirements

- Material testing to ensure quality and performance

- Engineering consulting to help you design and optimize your application

- Training and education on how to use the product safely and effectively

- Logistics and supply chain management to ensure timely delivery

Our goal is to provide our customers with the best possible experience when using our Metal Foam product. Contact us today to learn more about our technical support and services.

### Packing and Shipping:

Product Packaging:

Our Metal Foam product is carefully packaged to ensure it arrives at your doorstep in perfect condition. Each piece is wrapped in protective foam and placed in a sturdy cardboard box with additional cushioning to prevent any damage during shipping.

Shipping:

We offer free shipping within the United States and Canada via standard ground shipping. International shipping is available at an additional cost and varies depending on the destination. All orders are processed within 1-2 business days and typically arrive within 5-7 business days. You will receive a tracking number once your order has shipped so you can keep track of its progress.

### FAQ:

A: The brand name of this product is Victory.

Q: What is the model number of this product?

A: The model number of this product is Metal Foam.

Q: Where is this product made?

A: This product is made in China, specifically in JiangSu.

Q: What are the dimensions of the Metal Foam?

A: The dimensions of the Metal Foam vary depending on the specific product. Please refer to the product description for more information.

Q: What is the Metal Foam made of?

A: The Metal Foam is made of a lightweight metal alloy.
