

Corrosion Resistant Aluminum Foam Panel With Marble

Our Product Introduction

for more products please visit us on victory-alloy.com

Basic Information

- Place of Origin: China JiangSu
- Brand Name: Victory
- Certification: ISO SGS
- Model Number: Metal Foam

Product Specification

- Foam Type: Open-cell
- Thickness: Maximum Thickness 30mm
- Size: 500*500
- Application: Battery Electrode
- Package: Wooden Case
- Pore Size: 0.1-10 Mm
- Thermal Conductivity: 0.05-0.5 W/mK
- Surface: Mirror, smooth, etc
- Highlight: corrosion resistant aluminum foam panels,
aluminum foam panels with marble,
corrosion resistant aluminium foam panels

Product Description

Product Description:

The Metal Foam product is designed to have an Open-Cell foam type, which means that it has small pores that allow air and other substances to pass through it. This makes it an excellent choice for applications that require filtration, sound absorption, or thermal insulation. Additionally, the Metal Foam product is available with a range of different PPI options, including 10PPI, 20PPI, 30PPI, and 40PPI. This ensures that customers can find the perfect product for their specific needs.

One of the most impressive attributes of the Metal Foam product is its Compressive Strength, which ranges from 1-10 MPa. This makes it an incredibly strong and durable material that can withstand a variety of different stresses and pressures. Whether it is being used for construction, transportation, or manufacturing, the Metal Foam product is sure to provide reliable and long-lasting performance.

The Metal Foam product is created using a specialized process that involves a Foam Making Machine. This machine uses a variety of different materials and techniques to create a high-quality foam product that is consistent and reliable. Additionally, the Metal Foam product can be customized to meet the specific needs of different applications, ensuring that it is always the perfect fit.

Finally, the Metal Foam product is also an excellent choice for applications that require High Iron Buffer Foam. This type of foam is specifically designed to absorb impact and reduce the risk of damage or injury. With its impressive Compressive Strength and Open-Cell foam type, the Metal Foam product is an ideal choice for a wide range of industrial and commercial applications.

Applications:

One common use for Victory Metal Foam is in the construction industry. The product is known for its high compressive strength, which ranges from 1-10 MPa. This makes it an ideal material for use in building foundations, walls, and roofs. Additionally, the foam can be used as a lightweight insulation material that is easy to install and provides excellent thermal insulation.

Another application of Victory Metal Foam is in the automotive industry. The foam can be used to create flexible polyurethane foam cushions that are comfortable and durable. The foam can also be used to create bulk foam blocks that can be cut and shaped to fit specific vehicle parts, such as seats and headrests.

Victory Metal Foam is also ideal for use in the furniture industry. The foam can be used to create comfortable and durable cushions for sofas, chairs, and other types of furniture. The foam can also be used to create bulk foam blocks that can be shaped and cut to fit specific furniture designs.

Finally, Victory Metal Foam is an excellent choice for architects and designers who want to create unique and striking building facades. The aluminum foam panels are lightweight and easy to install, making them a popular choice for modern building designs.

In summary, Victory Metal Foam is a versatile and high-quality product that can be used in a variety of settings and scenarios. Whether you are in the construction, automotive, furniture, or architecture industry, this product can help you achieve your goals. So why wait? Order your Victory Metal Foam today and start creating!

Support and Services:

Our Metal Foam product technical support and services include:

Expert advice on product selection and application

Assistance with product installation and maintenance

Product training and educational resources

On-site technical support and troubleshooting

Product customization and engineering support

Warranty and repair services

Packing and Shipping:

Product Packaging:

The Metal Foam product will be carefully packaged in a sturdy cardboard box with bubble wrap to ensure that it arrives at its destination undamaged. The box will be labeled with the product name and any necessary handling instructions.

Shipping:

The Metal Foam product will be shipped via a reputable courier service such as FedEx or UPS. The shipping cost will be calculated based on the weight and destination of the package. Customers will be provided with a tracking number so they can track the progress of their shipment.

FAQ:

Q: What is the brand name of this product?

A: The brand name of this product is Victory.

Q: What is the model number of this product?

A: The model number of this product is Metal Foam.

Q: Where is this product manufactured?

A: This product is manufactured in China JiangSu.

Q: What are the primary uses of Metal Foam?

A: Metal Foam can be used for a variety of purposes such as thermal insulation, sound absorption, and impact resistance, among others.

Q: Can Metal Foam be recycled?

A: Yes, Metal Foam is recyclable and can be reused in a number of different applications.
