

1000-2500mm Heat Resistant Hastelloy Material Hastelloy Plate ASTM B575

Our Product Introduction

for more products please visit us on victory-alloy.com

Basic Information

- Place of Origin: China JiangSu
- Brand Name: Victory
- Model Number: Hastelloy Plate

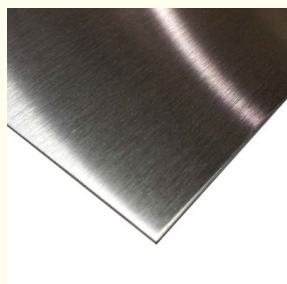

Product Specification

- Width: 1000mm - 2500mm
- Melting Point: 1325-1370°C
- Standard: ASTM B575, ASME SB575, ASTM B333, ASME SB333, ASTM B162, ASME SB162
- Heat Resistance: High
- Condition: Forging
- Package: Wooden Boxes Package
- Applications: Chemical Processing, Pollution Control, Flue Gas Desulfurization Systems, Waste Treatment, Pharmaceutical And Food Processing Equipment
- Surface: 2B No.1, 2D
- Highlight: 1000-2500mm hastelloy plate, Heat Resistant hastelloy plate,

Product Description

Product Description:

One of the most popular types of Hastelloy Alloy is the Hastelloy C22, which is widely used in various industries such as chemical processing, aerospace, and marine engineering. This alloy is composed of nickel, chromium, molybdenum, and tungsten, providing it with exceptional resistance to pitting, crevice corrosion, and stress corrosion cracking.

The Hastelloy Plate meets the standards set by ASTM B575, ASME SB575, ASTM B333, ASME SB333, ASTM B162, and ASME SB162, ensuring that it is of high quality and reliable. It is also available for sampling, allowing customers to test its compatibility and suitability for their specific needs.

The excellent corrosion resistance of the Hastelloy Plate makes it ideal for use in harsh and corrosive environments. It can withstand exposure to various chemicals and acids, making it suitable for use in chemical processing plants. Its durability and strength also make it ideal for use in aerospace and marine engineering, where it can withstand extreme temperatures and pressure.

Overall, the Hastelloy Plate is a reliable and high-quality product that is suitable for use in various industries. Its excellent corrosion resistance, durability, and strength make it an ideal choice for applications that require a material that can withstand harsh and corrosive environments.

Applications:

The Victory Hastelloy Plate is widely used in various industries, including chemical processing, pollution control, paper production, and more. Its resistance to corrosion and chemical attacks makes it ideal for use in harsh environments where other metals would quickly deteriorate.

The Victory Hastelloy Plate comes in various widths, ranging from 1000mm to 2500mm, making it suitable for a wide range of applications. It also comes in various surface finishes, including 2B, BA, No.1, No.4, No.8, HL, 8K, Mirror Finish, and more, giving customers the flexibility to choose the finish that best suits their needs.

The Victory Hastelloy Plate is packaged in wooden boxes, ensuring that it arrives at its destination in excellent condition. Our product is always in good stock, ensuring that customers can receive their orders promptly. We also allow sample orders, giving customers the opportunity to test our product before placing a larger order.

The Victory Hastelloy Plate is an excellent choice for anyone looking for a high-quality, durable metal product that can withstand harsh environments. It is made from Hastelloy B3, a nickel-molybdenum alloy that is highly resistant to corrosion and chemical attacks. Whether you are in the chemical processing, pollution control, or paper production industry, the Victory Hastelloy Plate is an excellent choice for your metal needs.

Customization:

Customize your Hastelloy Plate from Victory, made with high-quality Hastelloy material and alloy. Our plates are available in the Hastelloy B3 model number and are always in good stock, ready for forging. With a width range of 1000mm to 2500mm, our plates meet ASTM B575, ASME SB575, ASTM B333, ASME SB333, ASTM B162, and ASME SB162 standards. Proudly made in China JiangSu, samples are allowed for product testing and validation.

Support and Services:

Hastelloy Plate is a high-performance alloy that offers exceptional resistance to corrosion, oxidation, and other forms of degradation. It is commonly used in chemical processing, aerospace, and marine applications where extreme temperature and pressure conditions are present. Our product technical support and services for Hastelloy Plate include:

- Material selection guidance to ensure proper alloy choice for specific applications
- Technical consultation regarding material properties, fabrication, and welding processes
- Custom plate cutting and sizing services to meet specific project requirements
- Quality control and testing to ensure the highest level of product quality

Our team of experts is dedicated to providing exceptional technical support and services to ensure the successful use of Hastelloy Plate in your applications.

Packing and Shipping:

Product Packaging:

The Hastelloy Plate product will be securely packed in a wooden crate to prevent any damage during transportation. The crate will be sealed to ensure the product remains safe and protected during shipping.

Shipping:

We offer worldwide shipping for the Hastelloy Plate product. The product will be shipped via a reliable carrier that provides tracking information. Shipping costs will be calculated based on the destination and weight of the product. Customers can choose from a variety of shipping options depending on their preferences and urgency of delivery.

FAQ:

Q: What is the brand name of this product?

A: The brand name of this product is Victory.

Q: What is the model number of this product?

A: The model number of this product is Hastelloy Plate.

Q: Where is this product made?

A: This product is made in China JiangSu.

Q: What are the dimensions of this product?

A: The dimensions of this product vary depending on the size selected. Please refer to the product specifications for more information.

Q: What industries is this product suitable for?

A: Hastelloy Plate is suitable for industries such as chemical processing, aerospace, and marine engineering due to its high resistance to corrosion and oxidation.
