

Ni Cr Fe Mo Nb Stainless Plate Good Weldability Excellent Corrosion Resistance

Our Product Introduction

for more products please visit us on victory-alloy.com

Basic Information

- Place of Origin: China JiangSu
- Brand Name: Victory
- Model Number: High Temperature Alloy
- Minimum Order Quantity: 5
- Delivery Time: 5-7 Days

Product Specification

- Density: 8.2-9.4 G/cm3
- Technique: Hot Rolled
- Annealed: 700 – 800N/mm²
- Item Name: 2205 Stainless Plate
- Weldability: Good
- Grade: Ni Cr Fe Mo Nb
- Corrosion Resistance: Excellent
- Oxidation Resistance: Excellent
- Highlight: **Excellent Corrosion Resistance Stainless Plate,
Good Weldability Stainless Plate,
Excellent Stainless Plate**

Product Description

Product Description:

With excellent corrosion resistance, our High Temperature Alloy product is perfect for use in chemical processing, power generation, and other high temperature applications. Its good weldability makes it easy to work with, and allows for easy fabrication and repair.

Our High Temperature Alloy product is made from a Ni Cr Fe Mo Nb grade, giving it excellent mechanical properties and high temperature strength. With a density of 8.2-9.4 g/cm³, it is both strong and lightweight, making it perfect for a wide range of applications. When annealed, our High Temperature Alloy product has a tensile strength of 700-800 N/mm², making it one of the strongest and most reliable hard metal alloys on the market.

Whether you need a high end refractory alloy for chemical processing, power generation, or any other high temperature application, our High Temperature Alloy product is the perfect choice. With its excellent corrosion resistance, good weldability, and superior mechanical properties, it is the ideal choice for any project that requires strength, durability, and reliability.

Applications:

The Victory High Temperature Alloy is suitable for use in a wide range of product application occasions and scenarios. For instance, it is ideal for use in the production of high temperature alloy wire. The alloy wire is commonly used in the manufacturing of high temperature heating elements, electric furnaces, and other high temperature resistant materials.

The alloy is also suitable for use in the production of corrosion resistant alloys. The 2205 stainless plate is a popular product made from the Victory High Temperature Alloy. This product is highly resistant to corrosion and is widely used in the construction of chemical plants, oil and gas pipelines, and other industrial applications.

The Victory High Temperature Alloy is versatile and can be used in many other applications and scenarios. It is commonly used in the aerospace industry, where its excellent creep resistance and high temperature capabilities make it an ideal choice for aircraft engine parts and other components that operate at high temperatures. The alloy is also used in the automotive industry, where it is used in the production of high-performance engines and other critical components.

The minimum order quantity for the Victory High Temperature Alloy is 5, and the delivery time is typically 5-7 days. The alloy is produced using hot rolled technique, which results in a high-quality product that meets the highest industry standards.

Customization:

Support and Services:

Our High Temperature Alloy product comes with comprehensive technical support and services to ensure optimal performance and customer satisfaction. Our team of experts is available to assist with any technical inquiries or troubleshooting needs that may arise during installation or use of the product. We also offer customized solutions and recommendations to meet specific application requirements. Our services include product training, maintenance and repair, and on-site support. Additionally, we provide documentation and data analysis to help customers make informed decisions about their High Temperature Alloy product.

Packing and Shipping:

Product Packaging:

Our high temperature alloy product comes in a sturdy cardboard box with internal padding to ensure that it is protected during shipping. The box is sealed with high-quality tape to prevent any damage during transit. Inside the box, the product is further protected with bubble wrap to prevent any scratches or damage.

Shipping:

We use reliable shipping carriers to ensure fast and safe delivery of our high temperature alloy product to our customers. Upon dispatch, we will provide you with a tracking number so you can track your shipment and know when to expect delivery. Our shipping rates are competitive and we offer different options depending on your needs.

FAQ:

A: The brand name of this product is Victory.

2. Q: What is the model number of this high temperature alloy product?

A: The model number of this product is High Temperature Alloy.

3. Q: Where is this high temperature alloy product manufactured?

A: This product is manufactured in China JiangSu.

4. Q: What is the minimum order quantity for this high temperature alloy product?

A: The minimum order quantity for this product is 5.

5. Q: How long does it take to receive the high temperature alloy product after placing an order?

A: The delivery time for this product is 5-7 days.
