

Anti Oxidation 99% Pure Nickel Wires For Industrial

Our Product Introduction

for more products please visit us on victory-alloy.com

Basic Information

- Place of Origin: China
- Brand Name: Victory
- Model Number: Pure Nickel Wire

Product Specification

- Application: Industry, Electronic
- Elongation (\geq %): 35%
- Size: 0.025-10mm
- Shape: Wire
- Melting Point: 1435-1446°C
- Resistance ($\mu\Omega\cdot m$): 15
- Material: Ni
- Grade: N4, N6, Ni200, Ni201
- Highlight: **Anti Oxidation Pure Nickel Wires,
Industrial Pure Nickel Wires,
99% Pure Nickel Wires**

Product Description

Product Description:

One of the key benefits of this Pure Nickel Alloy wire is its high resistance to corrosion and oxidation. This makes it an ideal choice for use in a range of industries, where materials need to be able to withstand harsh environments and conditions. The wire has a resistance of 15 $\mu\Omega\cdot m$, making it an excellent conductor of electricity.

In terms of its shape, the Pure Nickel Alloy wire is available in a standard wire shape, which is ideal for use in a range of applications. The wire can be easily cut to the desired length, making it ideal for use in a range of different projects and applications. The wire is also highly flexible, making it easy to work with and manipulate.

When it comes to pricing, the Pure Nickel Alloy wire is highly competitive, with a nickel wire 0.025mm price that is affordable for most budgets. The wire is also available at a nickel wire price per meter, making it easy to purchase the exact amount of material needed for a particular project or application. The nickel wire price per meter is also highly affordable, making it an excellent choice for those looking for a cost-effective material to use in their projects.

Overall, the Pure Nickel Alloy wire is an excellent choice for those looking for a high-quality, durable, and long-lasting material for use in a range of applications. With its high resistance to corrosion and oxidation, excellent conductivity, and affordable pricing, it is a popular choice for those in the industry and electronics sectors.

Applications:

The Victory Pure Nickel Alloy Wire is widely used in the industry and electronic sectors. The wire is used in the manufacturing of electronic components, such as resistors, capacitors, and other electronic devices. It is also used in the industry for its high resistance to corrosion and wear. The wire is used in the manufacturing of industrial equipment, such as chemical processing equipment, heat exchangers, and other applications that require high resistance to corrosion and wear.

The 0.025mm Pure Nickel Wire is a popular product among Victory's Pure Nickel Alloy Wire range. The wire is available at a competitive price and is widely used in various applications. The wire is made of a nickel alloy that has a high resistance to corrosion and wear. It is suitable for use in electronic components, industrial applications, and other applications that require high corrosion resistance.

The Victory Pure Nickel Alloy Wire is a reliable and durable product that has a wide range of applications. The wire is widely used in various industries and electronic sectors due to its high resistance to corrosion and wear. If you are looking for a high-quality nickel wire 0.025mm price, Victory Pure Nickel Alloy Wire is an excellent choice. This product is made of a nickel alloy that is highly resistant to corrosion, wear, and tear, making it suitable for use in various applications.

Overall, Victory Pure Nickel Alloy Wire is a reliable and durable product that is widely used in various industries and electronic sectors. If you are looking for a high-quality nickel alloy wire, Victory Pure Nickel Alloy Wire is an excellent choice. It is a product that is made in China and has a wide range of applications due to its high resistance to corrosion and wear.

Customization:

- Brand Name: Victory
- Model Number: Pure Nickel Wire
- Place of Origin: China
- Hardness: S, 1/4H, 1/2H, 3/4H, H
- Grade: N4, N6, Ni200, Ni201
- Resistance ($\mu\Omega\cdot m$): 15
- Melting Point: 1435-1446°C
- Ni(min): 99%

Our customization services allow you to tailor your nickel wire to your specific needs. Whether you require a russian nickel wire 0.025 mm TKA or Ni200 grade, we can help you achieve the desired specifications for your project.

Support and Services:

Our Pure Nickel Alloy product is backed by our expert technical support and services team. We offer:

Material selection guidance

Custom alloy development

Technical consultation

Product testing and analysis

Quality assurance

Inventory management

Our team is dedicated to ensuring that our customers receive the highest level of support and service throughout the entire product lifecycle.

Packing and Shipping:

Product Packaging:

The Pure Nickel Alloy product will be carefully wrapped in bubble wrap to protect it during shipping.

It will then be placed in a sturdy cardboard box with foam padding to prevent any damage during transit.

The box will be labeled with the product name, quantity, and any necessary handling instructions.

Shipping:

We offer various shipping options to ensure the Pure Nickel Alloy product reaches you in a timely and secure manner.

Our shipping partners have been selected for their reliability and track record of delivering packages safely.

Please allow for standard processing and delivery times based on your location.

FAQ:

Q: What is the brand name of this product?

A: The brand name of this product is Victory.

Q: What is the model number of this product?

A: The model number of this product is Pure Nickel Wire.

Q: Where is this product made?

A: This product is made in China.

Q: What is the composition of this Pure Nickel Alloy?

A: This Pure Nickel Alloy is composed of 99.6% nickel.

Q: What is the diameter range of this Pure Nickel Wire?

A: The diameter range of this Pure Nickel Wire is from 0.05mm to 8.0mm.
