

Strong 40% Elongation Nickel Welding Wire High Melting Point

Our Product Introduction

for more products please visit us on victory-alloy.com

Basic Information

- Place of Origin: China
- Brand Name: Victory
- Model Number: Nickel Welding Wire

Product Specification

- Material: Nickel
- Shielding Gas: Argon
- Packaging Type: Spool
- Grade: ASME SFA 5.14 Class ERNiCu-7
- Tensile Strength: 600 MPa
- Application: Welding Of Nickel Alloys
- Wire Type: Solid
- Brinell Hardness Hb: ≤ 220
- Highlight: **Strong Nickel Welding Wire,
High Melting Point Nickel Welding Wire,
40% Elongation Nickel Welding Wire**

Product Description

Product Description:

Our Nickel Welding Wire is specifically designed to match the melting point of 1455°C, making it the perfect choice for welding nickel alloys. With a high elongation of 40%, you can be sure that this wire will provide a strong and durable bond, ensuring maximum performance of your welded components.

Our Nickel Welding Wire is made of high-quality nickel materials, ensuring that you can trust the quality of the wire. With this material, you can be assured that your welding components will withstand harsh environments and will maintain their strength and durability.

Our Nickel Welding Wire is suitable for a wide range of applications, including welding of inconel625. This welding wire is perfect for welding in aerospace, chemical processing, and marine industries where welding of nickel alloys is common.

Whether you are a professional welder or a DIY enthusiast, our Nickel Welding Wire is the perfect choice for your welding needs. It is easy to use and provides a consistent and reliable welding experience. With this wire, you can be sure that your welded components will have the strength and durability needed for any application.

Applications:

The Victory Nickel Welding Wire is a solid wire that is perfect for MIG welding. It has a Brinell hardness of ≤ 220 and a melting point of 1455°C, making it a reliable and durable welding wire.

This welding wire is suitable for a wide range of applications, including welding of nickel alloys, stainless steel, and other metals. It is ideal for use in the automotive, aerospace, and manufacturing industries.

The Victory Nickel Welding Wire is available in spool packaging, making it easy to use and store. It is designed to provide a consistent and reliable welding performance, ensuring that your welding projects are successful every time.

Whether you are a professional welder or a DIY enthusiast, the Victory Nickel Welding Wire is an excellent choice for all your welding needs. It is a high-quality welding wire that is easy to use and provides excellent results.

In conclusion, Victory Nickel Welding Wire is a reliable and durable welding wire that is perfect for MIG welding. It is suitable for a wide range of applications and is ideal for use in the automotive, aerospace, and manufacturing industries. If you are looking for high-quality welding wires, Victory Nickel Welding Wire is an excellent choice.

Support and Services:

The Nickel Welding Wire product has the following technical support and services:

- Technical assistance for welding procedures and welding equipment selection
- Assistance for proper storage and handling of the welding wire
- On-site training for welding personnel
- Product certifications and testing
- Troubleshooting assistance for welding defects

Packing and Shipping:

Product Packaging:

Spool weight: 1kg

Spool dimensions: 300mm x 100mm x 50mm

Each spool is vacuum-sealed and packed in a cardboard box for safe and secure shipping.

Shipping:

All orders are processed within 1-2 business days.

Shipping times may vary depending on the destination, but typically range between 5-10 business days.

Shipping rates will be calculated at checkout based on the weight and destination of the order.

We offer free shipping for orders over \$100.

Tracking information will be provided once the order has shipped.

FAQ:

Q: What is the brand name of this welding wire?

A: The brand name of this welding wire is Victory.

Q: What is the model number of this welding wire?

A: The model number of this welding wire is Nickel Welding Wire.

Q: Where is this welding wire manufactured?

A: This welding wire is manufactured in China.

Q: What is the diameter of this welding wire?

A: The diameter of this welding wire varies depending on the specific product, ranging from 0.8mm to 1.6mm.

Q: Can this welding wire be used for both MIG and TIG welding?

A: Yes, this welding wire can be used for both MIG and TIG welding applications.
