

## Professional Grade Nickel Mig Welding Wire 40% Elongation Bright Surface Finish

Our Product Introduction

for more products please visit us on [victory-alloy.com](http://victory-alloy.com)

### Basic Information

- Place of Origin: China
- Brand Name: Victory
- Model Number: Nickel Welding Wire

### Product Specification

- Material: Nickel
- Tensile Strength: 600 MPa
- Criterion: Aws A5.14, ASME 9
- Wire Type: Solid
- Melting Point: 1455°C
- Brinell Hardness Hb: ≤220
- Shielding Gas: Argon
- Elongation: 40%
- Highlight: 40% Elongation Nickel Mig Welding Wire, Professional Grade Nickel Mig Welding Wire

## Product Description

### Applications:

The Victory Nickel Welding Wire is a great choice for welding with Inconel 625 welding wire. It is a high-quality nickel weld wire that is designed to provide excellent results. The wire is made to meet the ASME SFA 5.14 Class ERNiCu-7 grade, which means that it meets the highest standards for quality and performance. The wire also meets the AWS A5.14 and ASME 9 criteria, which further ensures its quality and reliability.

This welding wire is suitable for use in a range of different product application occasions and scenarios. It can be used in a variety of different welding projects, such as welding pipes, tanks, and other metal components. The wire is also perfect for welding in harsh environments, where high temperatures and extreme conditions are common.

The Victory Nickel Welding Wire comes in a spool packaging type, which makes it easy to use and store. The spool packaging type is designed to keep the wire organized and tangle-free, which makes it easy to work with. Additionally, the spool packaging type makes it easy to transport the wire, whether you need to take it to a job site or store it in your workshop.

If you are looking for high-quality welding wires that will provide excellent results, the Victory Nickel Welding Wire is a great choice. It is a reliable, high-quality wire that is designed to meet the needs of a range of different welding scenarios.

### Support and Services:

Our Nickel Welding Wire product comes with comprehensive technical support and services to ensure that our customers have a seamless experience. Our technical team is available to answer any questions or concerns you may have about the product and its applications.

We offer product training and education to help customers understand the best practices for using our Nickel Welding Wire. We also provide guidance on welding techniques and troubleshooting to ensure that our customers achieve the desired results.

Our services also include product customization to meet specific requirements and needs. Our team can work with you to develop a customized solution that fits your unique specifications.

### Packing and Shipping:

Product Packaging:

Spool weight: 15kg

Spool dimensions: 300mm x 100mm

Each spool is shrink-wrapped and packed in a cardboard box

Shipping:

Shipping method: By sea, air, or land transportation

Shipping time: Within 2-3 weeks after payment confirmation

Shipping cost: Calculated based on destination and weight

### FAQ:

**Q:** What is the brand name of this welding wire?

**A:** The brand name of this welding wire is Victory.

**Q:** What is the model number of this welding wire?

**A:** The model number of this welding wire is Nickel Welding Wire.

**Q:** Where is this welding wire made?

**A:** This welding wire is made in China.

**Q:** What is the diameter of this welding wire?

**A:** The diameter of this welding wire can vary depending on the specific product. Please refer to the product specifications for more information.

**Q:** What materials can be welded using this welding wire?

**A:** This welding wire is specifically designed for welding nickel and nickel alloys.
