Solid Type Inconel 625 Welding Wire For Precise And Durable Welding Results

Basic Information

Place of Origin: ChinaBrand Name: Victory

Model Number: Nickel Welding Wire

Product Specification

• Melting Point: 1455°C

Application: Welding Of Nickel Alloys

Tensile Strength: 600 MPa
Shielding Gas: Argon
Brinell Hardness Hb: ≤220
Packaging Type: Spool

• Criterion: Aws A5.14, ASME 9

• Wire Type: Solid

• Highlight: Durable Inconel 625 Welding Wire,

Solid Inconel 625 Welding Wire, Precise Inconel 625 Welding Wire

Product Description:

Our Inconel625 welding wire is made from high-quality nickel material, ensuring that it is durable and will last for the duration of your welding project. The nickel material also provides excellent corrosion resistance, making it an ideal choice for welding applications that will be exposed to harsh environments.

With an elongation of 40%, our welding wire is flexible and easy to use, making it the perfect choice for a range of welding projects. Whether you are a professional welder or a DIY enthusiast, our Inconel625 welding wire is the ideal choice for your welding needs. At a diameter of 0.8mm, our welding wire is the perfect size for a range of welding applications. The small diameter makes it easy to maneuver and control, ensuring that you can achieve precise welds every time.

So if you are looking for high-quality welding wires that are perfect for a range of welding applications, look no further than our Inconel625 welding wire. With its solid wire type, high melting point, and durable nickel material, our welding wire is the perfect choice for your next welding project.

Applications:

With its excellent resistance to corrosion and oxidation, the Victory Nickel Welding Wire is perfect for use in harsh environments such as marine, chemical, and petrochemical industries. It is also suitable for welding applications in the aerospace and automotive sectors. The Victory Nickel Welding Wire is a versatile product that can be used for a variety of welding wires, including TIG welding wire. Its high melting point of 1455°C makes it ideal for welding applications requiring high temperatures.

This welding wire is made in China and meets the ASME SFA 5.14 Class ERNiCu-7 grade, ensuring the highest quality standards. It is designed to be used with Argon shielding gas, which provides excellent protection against contamination during the welding process. The Victory Nickel Welding Wire is suitable for use in various scenarios, including the repair and maintenance of equipment, the fabrication of components, and the construction of structures. Its high corrosion resistance and durability make it a reliable choice for welding applications in harsh environments.

Support and Services:

The Nickel Welding Wire product comes with technical support and services to ensure proper usage and performance. Our team of experts can provide assistance with product selection, welding process optimization, troubleshooting, and more. We offer training and seminars to help customers improve their welding skills and knowledge. Our services also include customized solutions for specific welding applications and requirements. Contact us for more information.

Packing and Shipping:

Product Packaging:

The Nickel Welding Wire is packaged in a sturdy plastic spool. The spool is then placed in a cardboard box with appropriate cushioning materials to ensure the product arrives in good condition.

Shippina:

The Nickel Welding Wire is shipped via standard ground shipping. Orders are typically processed and shipped within 1-2 business days. Shipping times may vary depending on the destination.

FAQ:

- Q: What is the brand name of this welding wire?
- A: The brand name of this welding wire is Victory.
- Q: What is the model number of this welding wire?
- A: The model number of this welding wire is Nickel Welding Wire.
- Q: Where is this welding wire manufactured?
- A: This welding wire is manufactured in China.
- Q: What materials can be welded using this welding wire?
- A: This welding wire is specifically designed for welding nickel and nickel alloy materials.
- Q: What sizes are available for this welding wire?
- A: This welding wire is available in various sizes ranging from 0.8mm to 3.2mm.
