

ASME SFA 5.14 Class ERNiCu-7 Grade Alloy Welding Wire For High Strength Projects

Our Product Introduction

for more products please visit us on victory-alloy.com

Basic Information

- Place of Origin: China
- Brand Name: Victory
- Model Number: Nickel Welding Wire

Product Specification

- Surface Finish: Bright
- Elongation: 40%
- Weight: 1kg
- Packaging Type: Spool
- Shielding Gas: Argon
- Certificates: AWS 5.14 Class ERNiCu-7
- Criterion: Aws A5.14, ASME 9
- Melting Point: 1455°C
- Highlight: **ASME SFA 5.14 Alloy Welding Wire,
High Strength Projects Alloy Welding Wire**

Product Description

Product Description:

Our Nickel Welding Wire meets the highest standards in the industry, including AWS A5.14 and ASME 9, ensuring that you are getting a product that is both safe and reliable. The wire is made to the highest quality standards, so you can trust that you are getting a product that is second to none.

This welding wire is certified to the AWS 5.14 Class ERNiCu-7, which means that it meets the highest standards of quality and performance. It is designed to provide excellent weldability and is suitable for use in a range of applications, including welding of nickel alloys, steel, and other metals.

The surface finish of this nickel welding wire is bright, which means that it is easy to work with and provides a clean finish. The bright finish also makes it easy to see the weld area, which is essential for ensuring that your welds are of the highest quality.

This welding wire is graded to ASME SFA 5.14 Class ERNiCu-7, which means that it is suitable for use in a range of applications, including nuclear, aerospace, and other high-performance welding applications. It is also suitable for use in welding of pressure vessels, piping, and other critical components.

The weight of this nickel welding wire is 1kg, which makes it easy to handle and transport. Whether you are using it for MIG welding or TIG welding, you can be sure that this welding wire will provide the performance and reliability that you need to get the job done right. So why wait? Order your Nickel Welding Wire today and experience the performance and reliability that you need for all your welding projects!

Applications:

The Victory Nickel Welding Wire is an ideal choice for welding applications that require high strength and durability. It can be used in a variety of applications, including the construction of bridges, pipelines, and other heavy-duty structures. The wire is also suitable for welding nickel alloys, copper-nickel alloys, and other similar materials. It is also commonly used in the marine and offshore industries due to its high corrosion resistance and strength.

The Victory Nickel Welding Wire is a versatile product that can be used in a variety of welding scenarios. It is ideal for welding thin to medium thickness materials and can be used in both manual and automated welding applications. The wire produces a smooth and stable arc that ensures high-quality welds with minimal spatter and slag. It is also easy to use and produces consistent results, making it a popular choice for both novice and experienced welders.

The Victory Nickel Welding Wire is a reliable and durable product that is designed to meet the needs of professional welders. It is a cost-effective option that provides excellent value for money and is backed by a range of certificates and testing standards. Whether you are working on a large construction project or a small welding job, the Victory Nickel Welding Wire is the perfect product for all your welding needs.

Support and Services:

Our Nickel Welding Wire product provides excellent welding performance with high corrosion resistance and good ductility. To ensure optimal results when using our welding wire, we offer technical support and services to assist with any questions or concerns you may have.

Our team of experts can provide guidance on proper storage and handling of the welding wire, as well as advice on selecting the appropriate welding parameters for your specific application. We also offer customized training programs to help you and your team improve your welding skills and achieve better results.

In addition, we provide a range of services to support your welding operations, including on-site testing and analysis, equipment calibration, and maintenance and repair services.

At our company, we are committed to providing our customers with the highest level of support and service to ensure their success in welding applications. Contact us to learn more about our technical support and services for our Nickel Welding Wire product.

Packing and Shipping:

Product Packaging:

Spool Weight: 25kg

Packaging: Plastic Spool

Outer Packaging: Cardboard Box

Shipping Information:

Shipping Weight: 26kg

Shipping Dimensions: 36cm x 36cm x 20cm

Shipping Method: International Express

FAQ:

Q: What is the brand name of this welding wire?

A: The brand name of this welding wire is Victory.

Q: What is the model number of this welding wire?

A: The model number of this welding wire is Nickel Welding Wire.

Q: Where is this welding wire manufactured?

A: This welding wire is manufactured in China.

Q: What is the diameter of this welding wire?

A: The diameter of this welding wire can vary depending on the specific product, but we offer various diameters ranging from 0.8mm to 3.2mm.

Q: What types of welding is this wire suitable for?

A: This welding wire is suitable for TIG welding and MIG welding of nickel-based alloys.
