

Marine Grade Hastelloy C276 Bar With Superior Strength And Corrosion Resistance

Our Product Introduction

for more products please visit us on victory-alloy.com

Basic Information

- Place of Origin: China
- Brand Name: Victory
- Model Number: Hastelloy Bar

Product Specification

- Applications: Chemical Processing, Aerospace, Marine, Nuclear, Etc.
- Hardness: HRC 30-40
- Magnetic Properties: Non-magnetic
- Elongation: 40%
- Melting Point: 1350-1400°C
- Corrosion Resistance: Excellent
- Size: Customizable
- Density: 8.22 G/cm³
- Highlight: **Superior Strength Hastelloy C276 Bar,
Corrosion Resistance Hastelloy C276 Bar,
Marine Grade Hastelloy C276 Bar**

Product Description

Product Description:

Made from high-quality Hastelloy metal, our Hastelloy Bar is a top-of-the-line product that boasts a yield strength of 310 MPa and a tensile strength of 690 MPa. With an elongation of 40%, this bar is both strong and flexible, making it an ideal choice for a wide range of industrial applications.

Our Hastelloy Bar is fully customizable to meet your specific size requirements. Whether you need a small bar for a specialized project or a large bar for heavy-duty applications, we can provide you with the size and shape you need.

Not only is our Hastelloy Bar strong and durable, but it is also highly resistant to corrosion and oxidation. This makes it an ideal choice for use in harsh environments where other metals might suffer from corrosion or other forms of degradation.

Our Hastelloy Bar is often used in a variety of industrial applications, including chemical processing, aerospace, and oil and gas production. It is a popular choice for these applications due to its exceptional strength, flexibility, and resistance to corrosion and oxidation.

So if you're looking for a top-quality metal bar that can handle even the toughest industrial environments, look no further than our Hastelloy Bar. With its combination of strength, flexibility, and resistance, it is the perfect choice for your next project.

Applications:

The Hastelloy C22 Bar is commonly used in chemical processing, pharmaceuticals, petrochemicals, and other harsh environments where corrosion is a major concern. This product is ideal for applications where exposure to corrosive chemicals and acids is common, as it can withstand a wide range of aggressive chemicals without experiencing any damage or degradation in performance.

One of the primary benefits of using Hastelloy C22 Bar is its excellent corrosion resistance, which includes resistance to pitting, crevice corrosion, and stress corrosion cracking. This makes it an ideal choice for use in harsh environments where other metals would quickly degrade. Additionally, Hastelloy C22 Bar is non-magnetic, which further increases its flexibility and usefulness in a variety of applications. Another key benefit of Hastelloy C22 Bar is its high yield and tensile strength. With a yield strength of 310 MPa and a tensile strength of 690 MPa, this product is incredibly strong and durable, making it an excellent choice for high-stress applications. Moreover, the unique shape of the Hastelloy C22 Bar makes it easy to handle and work with, making it an excellent choice for manufacturing and fabrication processes.

In summary, Victory's Hastelloy C22 Bar is an exceptional product that offers a wide range of benefits and applications. Its excellent corrosion resistance, non-magnetic properties, and high strength characteristics make it an ideal choice for use in chemical processing, pharmaceuticals, petrochemicals, and other harsh environments. Whether you are looking for a reliable metal alloy for manufacturing, fabrication, or other industrial applications, the Hastelloy C22 Bar is an excellent choice that will provide you with the durability and performance you need.

Support and Services:

Hastelloy Bar is a high-performance alloy that offers excellent resistance to corrosion, oxidation, and high temperatures. Our technical support team is available to provide guidance on material selection, fabrication, and application of Hastelloy Bar. We also offer a range of services to meet your specific needs, including machining, heat treating, and testing.

Our team of experienced engineers and metallurgists are committed to delivering high-quality Hastelloy Bar that meets your specifications. We offer customized solutions to meet your unique requirements, including special sizes, shapes, and tolerances.

Whether you need assistance with material selection, technical support, or customized solutions, our team is here to help. Contact us today to learn more about our Hastelloy Bar products and services.

Packing and Shipping:

Product Packaging:

The Hastelloy Bar products are packaged securely in wooden crates or boxes. The crates are lined with moisture-resistant materials to prevent any damage to the product during transportation. Each crate contains a label with the product name, dimensions, and weight for easy identification.

Shipping:

We offer both domestic and international shipping for the Hastelloy Bar products. Domestic shipping is done through trusted courier services, and international shipping is done via air or sea freight. We ensure that all products are properly packed and secured before shipping to prevent any damage or loss during transportation.

FAQ:

Q: What is the brand name of this product?

A: The brand name of this product is Victory.

Q: What is the model number of this product?

A: The model number of this product is Hastelloy Bar.

Q: Where is this product manufactured?

A: This product is manufactured in China.

Q: What are the dimensions of this product?

A: The dimensions of this product vary depending on the size of the bar. Please refer to the product specifications for more information.

Q: What are the applications of this product?

A: Hastelloy Bar is commonly used in harsh chemical environments such as chemical processing, petrochemicals, and pollution control. It is also used in aerospace and marine applications due to its excellent corrosion resistance.
